ABOUT

I am a 22-year-old BS Information Technology graduate with strong experience in both frontend and backend development. I specialize in creating responsive user interfaces, building functional backend systems, and designing system architecture. I am committed to continuously improving my skills, exploring modern technologies, and applying my expertise to real-world projects. I aim to contribute to an organization where I can grow professionally while strengthening my capabilities as an IT professional.

OBJECTIVES

To ensure the company's success by finishing the task that is given to me, as well as being productive and being active employee in this company. I aim to continuously develop my skills, contribute to the company's goals, and maintain positive attitude while working.
